EDUCATION

R.V.R and J.C College of Engineering Chowdavaram, AP
Bachelor of Technology May 2026
Major in Computer Science Engineering;
Cumulative GPA: 8.80/10.0(till date);

Matrix Junior College Guntur, AP
Intermediate education Jul 2020- Jul 2022
In Maths, Physics ,Chemistry
Percentage : 96.7 %

EXPERIENCE

Pardhu & Sanjay Solutions Pvt. Ltd. May 2025 – July 2025
React Developer Intern **Certificate**

- Built web interfaces using **React** and integrated **Capsule's APIs** to enable dynamic website functionality.
- Developed reusable front-end components and improved responsiveness for better user experience.
- Collaborated with the team on **API-driven feature implementation** and debugging across different modules.

Nomotix July 2024 – Present
Technical Team lead, Startup

- Led the design and development of a MERN-stack web platform and React Native (Expo) mobile apps for online car mechanic booking and real-time service allocation, targeting 1,000+ early users pre-launch.
- **Architected and Implemented scalable backend systems** with live tracking, booking management, and real-time notifications, projected to handle **10,000+ concurrent sessions** at scale.
- **Directed and mentored** a 6-member cross-functional team**,** implementing **Agile sprint cycles, Git-based workflows, and CI/CD pipelines,** improving release velocity **by 40%** and **maintaining 95%** code review compliance.

House Way.Co Aug 2025 – Present
Mobile Application Developer, Freelancer

- Implementing **end-to-end** role-based **dashboards** for User, Vendor, Employee, Owner, and Admin with modular architecture using **React-Native**.
- Introduced **first-of-its kind Moodboard** design patterns in the User Dashboard for project listing, selection, and timelines.
- Designed innovative concepts of **"building and lift"** concept to visualize **project stages** and **progress**.
- Project is in **active development, with** continuous feature implementation**,** UI/UX optimization, and performance improvements.

PROJECTS

Resume ATS Score Calculator Feb 2024 - April 2024
Github

- Developed an intelligent ATS scoring engine powered by the Gemma model (local) and Gemini API (server-side) to evaluate resume–job description compatibility with high precision and scalability.
- Engineered **NLP pipelines** for **keyword extraction**, **semantic similarity**, and s**kill–role alignment**, achieving >92% accuracy in ATS score predictions compared to benchmark datasets.
- Outperformed commercial tools like **ResumeWorded** and **Resume.io**, delivering 40% more consistent scoring and actionable improvement feedback tailored to individual resumes.
- Built as a **production-ready module**, supporting both **local inference (Gemma)** and **cloud-based evaluation (Gemini)** for enterprise-grade resume analytics and recruiter integration.

Dynamic Pricing Model April 2025 - June 2025

Colab Notebook

- Built a **deep neural network**–based **demand forecasting** model for seasonal retail products, improving prediction **accuracy by ~20%** over baseline models.
- Developed a **Deep Q-Learning** (DQL) optimization algorithm for joint pricing and inventory decisions, achieving **25% higher revenue** and **40% faster convergence** than traditional methods.
- Integrated dual neural networks for primary and discount sales periods, enabling **real-time dynamic pricing** and **order allocation in large state–action** spaces.
- Validated the model on real-world clothing industry data, demonstrating scalable and profitable optimization for **monopolistic retail environments.**

ACHIEVEMENTS

DEMUX 2.0 (First Prize)
Certificate
A 24-hour hackathon in domain of **Web Development** among 165 teams.

TECH SPARK (Second Prize)
Intra Department **Project Development Contest** among 55 teams.

CIS'SORRIE 2024. (First Prize)
Certificate
National level Technical Student Meet organized by CISA an event on **Competitive coding**.

CODESPIRE (First Prize)
Certificate
Intra College level Competitive Coding Competition on **C and Python** among 500 participants.

SMART HACKS
Certificate
Among **top 10 teams ,** organized in ANURAG University by I**EEE SBC in Collaboration with IEEE CIS/GRSS JT.Chapter of Hyd Section**, a 48-hour hackathon for **Ideation and prototype** of **business efficient problems.**

TECHNICAL SKILLS

- **Programming Languages :** Python, R, C, C++, JavaScript, HTML/CSS, Python, Node.js, Django, React.js, Express.js ,SQL[1]
- **Software :** MS-Excel, Google Colab, Jupyter Notebook, Matlab, Github
- **Libraries:** NumPy, Pandas, Matplotlib, Scikit-learn, Scipy, Pytorch, TensorFlow
- **ML algorithms:** Regression, Classification, Decision Tree, Random Forest, NLP[2], Neural Networks : ANN[3]
- **Databases & Backend:** MongoDB (CRUD, Indexing, Aggregation), REST APIs.

POSITIONS OF RESPONSIBILITY

Coordinator, ACM June 2024 -June 2025

- Volunteered for coding competitions, quizzes, and tech programs organized under ACM in college.
- Assisted in event planning, problem-setting, and coordination to ensure **smooth execution of** competitions.
- Supported participant engagement and motivate students through campaign towards participation enhancing overall event experience.

Organiser , NEC backed Eureka@RVRJC August 2025

- Organised EUREKA@RVRJC an Idea Pitching Competition, fostering innovation and entrepreneurship among students.
- Identified high-potential ideas and guided participants toward funding and incubation opportunities, enhancing the competition's real-world impact.

Coordinator, Freshers Event Sep 2023

- Organized the annual Freshers' Event, handling logistics, scheduling, and overall execution for a seamless student experience.
